

## MIRROR MIRROR

### What is TRANSPOSITION?

When signing, space is to be described according to how YOU (the signer) see things. The other person must transpose the image to visualise it correctly.

### How to play:

1. Students pair up, seated on opposite ends of the room
2. Student A describes the different patterns on their paper. Student B copies, considering transposition rules
3. Students check to see if illustrations were drawn correctly, and swap turns, using different patterned paper
